

How to Make A Water Cycle Terrarium

Pick up a kit a North City Water District Drive-up window while supplies last or make with materials at home.

(Please call 206-362-8100 to confirm availability of the kit)

Materials

- Plastic or glass container with a lid.
- Dirt.
- Small rocks or gravel.
- Seeds (optional but fun).
- Water (spray bottle works best, or use 2 TBS water).
- Moss or plant matter.
- Dinosaur or other small figurine for decoration (optional but fun).
- Sharpies or stickers to decorate.

Instructions

1. Fill the bottom of the cup with rocks. This provides drainage.
2. Fill cup halfway with dirt.
3. If you are using seeds gently pat them into the dirt.
4. Make it Rain!
 - Spray water until soil is damp, or add about 2 TBS water to your soil.
 - The soil should be damp, not soaked.
5. Add a bit of moss or plant matter for decoration.
6. Add the dinosaur figurine or other small figurine for decoration.
7. Close the lid and decorate with weather stickers or draw your own sun, rain and clouds on the cup or jar.
8. Place your Terrarium in a sunny window and watch it for changes every day. Remember to keep the lid on.
